Say what you want! Speak loud and clear!
Create powerful Embroidery with your message!

Font Show

It takes a bit of imagination and power design!

Hallo!

Hallo!

1. First type the text you want

2. With just the use of the **Text Property Bar** changing type faces, sizes and positions, you can create a fancy message to embroidery!

3. Use the **Shape Tool** on the word to move the letters around!
...Have Fun!

Hallo!

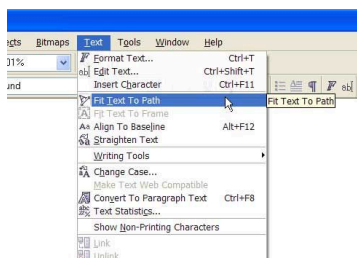

4. You can easily turn plain text into art!

5. Add some brush strokes with the **Artistic Media Tool** and create a funny face!
Click on the **stitch** tab and watch the design embroidered!

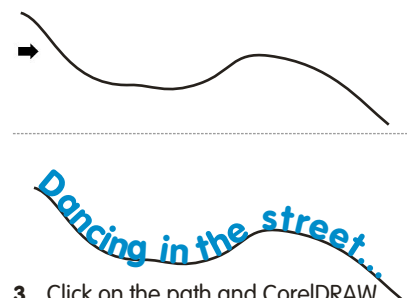

Text on a path

The **Fit Text To Path** tool lets you bind text to a path, leaving both the path and the original text editable.

Dancing in the street...

Dancing in the street...

1. To place your text on a path, you need some text, and a path.
The path can be created in any manner, either from a freehand line or from any shape.

2. Select the text and from the **Text** menu click **Fit text to Path**. This changes the cursor to a large black arrow: ➡

3. Click on the path and CorelDRAW automatically runs the letters on the path!
Ctrl+click on the path to select it and from **Outline Width** select **None**:

Dancing in the street...

4. Voila! Now you can add some more enhancements on the design.

5. This is the final stage as shown in **DRAWings**.
Notice the change in the colors, the letter rotations etc.
All the above steps are done, while the text stays on the path!
